

*Intelligent Hot Water*

## Cloud/iOT Project Engineer

We are an exciting clean energy company developing our next-gen platform for the Internet of things. iNTouch by Intellihot is the industry's most innovative solution for transforming products into cloud-connected devices quickly, easily and economically. We integrate innovative and highly efficient technology with best-in-class hardware, applications, and cloud-based services

We are looking for some exceptional engineers to join the Intellihot Cloud team. You will be responsible for the various projects that build the next-gen iOT

### What You Will Be Doing

1. Working in an engineering culture that is customer focused
2. Working with industry partners to design and develop hardware and software
3. Implementing highly scalable and reliable systems connectivity
4. Using technologies for real-time data processing and dashboard systems
5. Play a significant role and make an impact on the company's success

### Desired Skills and Experience

1. Familiarity with mobile data communication protocols
2. Experienced with implementing RESTful web services
3. Familiar with iOT API or similar architecture
4. BS or MS in Computer Science / Electronics

At least one or more of the following skills: Object Oriented Design, Ruby on Rails, Java, Javascript frameworks, AWS, RESTful services, MySQL, Cassandra

This position will be part of a new, exciting and high growth industry. If you are a driven designer to-be with the applicable knowledge and experience, please apply today!
