

Intellihot

FT. STOCKTON PILOT FLYING J TAKES OFF WITH INTELLIHOT.

Pilot Flying J, the largest travel center in North America, serves many travelers on the road each year and when the Ft. Stockton Pilot Flying J lost one of their water heaters, they needed to replace it immediately and went with one of Intellihot's Neuron Series.

Industry

Retail

Property Details

9 Showers

109 Parking Spots

8 Diesel Fuel Lanes

Subway

Cinnabon

Product Installed

One iN501

Installed Capacity

500,000 BTU/hr

Zero Gallons storage

Installation Date

June 2019

Pilot Flying J Travel Center Fort Stockton, TX

Pilot Flying J in Ft. Stockton, Texas is a North America chain of truck stops in the United States and Canada and provides many services to travelers in Texas.

This facility has nine showers and a public laundromat that many truckers rely on, and when one of their tank water heaters broke down, they reached out to Intellihot for help.

We really appreciate the space-saving design and built-in redundancy that the Intellihot Neuron offers us.

**-Sean Keeler,
Sr. Facility Support Analyst**

The Problem

The travel center had two tank water heaters in their facilities each at 500,000 BTU/hr. One of the heaters broke down and needed to be replaced immediately to keep hot water available for the showers and laundromat.

The Intellihot Solution

One iN501 was dropped in without having to do any re-piping or additional plumbing, saving money on installation costs. The Neuron unit is slimmer, so it saves space while providing built-in redundancy.

Endless water, Zero waste

Our systems are smart; from the moment they start running, they begin to learn typical usage patterns. They adapt, heating up the amount of water you need: no more; no less. While traditional boilers run 24/7/365 waiting to be used, Intellihot systems heat water on demand and keep it flowing when and where people need it. Our process conserves up to 40% of the energy lost in traditional water heating methods. No more waiting, no more wasting.

Less is more

Intellihot saves money, time and space from installation to operation. Our technology gets up and running quickly and costs less to operate month after month. With all the power of alternative systems at a fraction of the size, our design makes space-hogging boilers and storage tanks totally obsolete.

Too smart to fail

What we make performs to nearly impossible standards. As robust as diesel engines, Intellihot systems are built for decades of like-new operation. Reliability is designed into every inch, from maintenance-free heat exchangers to systems that deliver industrial water capacities without risk of single-point failure. The best part? Built in redundancy and no master controller with our patented masterless cascading technology.

Change Made Effortless

Technology should adapt to people, not the other way around. Our systems are simple to install, use and maintain - for our customers and our customers' customers. Even as our innovations operate out of sight, every aspect is crafted to be enjoyable, intuitive and surprisingly smart.
