## PANCAKE PANTRY FLIPS FOR INTELLIHOT

This popular local restaurant selected Intellihot's high-efficiency, tankless water heater when their old water heater and storage tank began to fail.

### Product Installed

One iN501

### Installed Capacity

500,000 BTU/hr

Zero Gallons storage

### Installation Date

June 2019

### Pancake Pantry Gatlinburg, TN

The Pancake Pantry was Tennessee's first pancake specialty restaurant opening up in 1960. Over the last half-century, they've grown and are committed to excellence by offering unique dishes all made from scratch. With its warm atmosphere of century-old brick and majestic slate roof, it has become a tradition for many visitors who come to Gatlinburg.

“Very impressed with the capability of the unit. The technology is unbelievable and only takes 1/3 of the space.”

**-Garry Myers,  
Manager**

“The install time was cut in half in comparison to a “like for like” installation.”

**-Mike O'Connor,  
Mo's Mechanic**

## The Problem

The Pancake Pantry had two 50-gallon water heaters, plus one 100-gallon storage tank that was failing and potentially jeopardizing operations. They needed replacements, and we're looking for something efficient and space-saving.

## The Intellihot Solution

One iN501 replaced their failing water heating system, and with no storage tank it took up only 1/3 of the space. The Neuron unit is slimmer, so it saves space while providing built-in redundancy.

## Endless water, Zero waste

Our systems are smart; from the moment they start running, they begin to learn typical usage patterns. They adapt, heating up the amount of water you need: no more; no less. While traditional boilers run 24/7/365 waiting to be used, Intellihot systems heat water on demand and keep it flowing when and where people need it. Our process conserves up to 40% of the energy lost in traditional water heating methods. No more waiting, no more wasting.

## Less is more

Intellihot saves money, time and space from installation to operation. Our technology gets up and running quickly and costs less to operate month after month. With all the power of alternative systems at a fraction of the size, our design makes space-hogging boilers and storage tanks totally obsolete.

## Too smart to fail

What we make performs to nearly impossible standards. As robust as diesel engines, Intellihot systems are built for decades of like-new operation. Reliability is designed into every inch, from maintenance-free heat exchangers to systems that deliver industrial water capacities without risk of single-point failure. The best part? Built in redundancy and no master controller with our patented masterless cascading technology.

## Change Made Effortless

Technology should adapt to people, not the other way around. Our systems are simple to install, use and maintain - for our customers and our customers' customers. Even as our innovations operate out of sight, every aspect is crafted to be enjoyable, intuitive and surprisingly smart.
