

Intellihot

Popular local restaurant selects Intellihot for their newest location.

This popular restaurant chain selected Intellihot's high-efficiency, tankless water heaters for their newest location. Saving on valuable space, the compact Intellihot units are easily able to meet the restaurant's peak hot water demands.

Ferguson Enterprises

 We have been very pleased with the Intellihot units so far. They have kept up with our lunch hour rush on weekdays as well as dinner rush on Friday and Saturday nights. The three iQ251 wall-hung units take up less space and are more efficient than standard tank-type water heaters.

- **Nelia Kirtley, Owner** 

Soccer Taco, Knoxville, TN

The heart of Soccer Taco formed in 2005 around three concepts: authentic Mexican food, the importance of family and friends, and soccer. The owners who are all women, set out to create a unique dining experience - a Latin sports bar emphasizing fútbol (soccer), and a menu inspired by Mexican taquerías ('taco shops').

The Problem

Space (sq/ft) inside Soccer Taco's newest West Knoxville location was at a premium and could not accommodate a traditional 100 gallon tank. They did not have space for a mechanical room which forced them to locate the water heaters in a narrow hallway in the back of the restaurant.

The Intellihot Solution

Three iQ251 commercial wall-hung units provide plenty of capacity during the restaurant's peak demand. Having three individual heaters provides the restaurant with much-needed redundancy and assurance that they will not run out of hot water during their lunch and dinner rush hours.

Endless water, Zero waste

Our systems are smart; from the moment they start running, they begin to learn typical usage patterns. They adapt, heating up the amount of water you need: no more; no less. While traditional boilers run 24/7/365 waiting to be used, Intellihot systems heat water on demand and keep it flowing when and where people need it. Our process conserves up to 40% of the energy lost in traditional water heating methods. No more waiting, no more wasting.

Less is more

Intellihot saves money, time and space from installation to operation. Our technology gets up and running quickly and costs less to operate month after month. With all the power of alternative systems at a fraction of the size, our design makes space-hogging boilers and storage tanks totally obsolete.

Too smart to fail

What we make performs to nearly impossible standards. As robust as diesel engines, Intellihot systems are built for decades of like-new operation. Reliability is designed into every inch, from maintenance-free heat exchangers to systems that deliver industrial water capacities without risk of single-point failure. The best part? Built in redundancy and no master controller with our patented masterless cascading technology.

Change Made Effortless

Technology should adapt to people, not the other way around. Our systems are simple to install, use and maintain - for our customers and our customers' customers. Even as our innovations operate out of sight, every aspect is crafted to be enjoyable, intuitive and surprisingly smart.
