

Intellihot

Intellihot ensures hot water for leading insurance company.

This leading insurance company's headquarters needed to upgrade its aging water heating equipment to a more efficient design that would provide them reliable hot water and help reduce their monthly gas consumption.

Industry

Retail

Property Details

324,800 sq. ft.

Commercial office building

Product Installed

One iQ1001

Zero Storage

Installed Capacity

1,000,000 BTU/hr

Zero Gallons storage

Installation Date

April 2017

Representative

Southern Farm Bureau Insurance, Jackson, MS

Southern Farm Bureau Life Insurance Company, chartered in 1946, began operations on January 2, 1947, as a capital stock life insurance company. Today the organization has branched into cities and towns all over the South. As a result of their dedication to quality service, Southern Farm Bureau Life Insurance has grown in strength and stability. On July 1, 1980, the company moved into this new office building and held its first day of full operations. At the time, the new office was the largest non-government single occupant office building in the state of Mississippi.

The Problem

The company had a 1000 MBH boiler and a 500 gallon storage tank. Their old boiler was becoming problematic and unreliable. They made the decision to upgrade rather than continue to pour money into repairing it.

The Intellihot Solution

One Intellihot iQ1001 was purchased and installed in the building, and it is supplying this commercial office space with all the hot water it needs, without a single storage tank.

Endless water, Zero waste

Our systems are smart; from the moment they start running, they begin to learn typical usage patterns. They adapt, heating up the amount of water you need: no more; no less. While traditional boilers run 24/7/365 waiting to be used, Intellihot systems heat water on demand and keep it flowing when and where people need it. Our process conserves up to 40% of the energy lost in traditional water heating methods. No more waiting, no more wasting.

Less is more

Intellihot saves money, time and space from installation to operation. Our technology gets up and running quickly and costs less to operate month after month. With all the power of alternative systems at a fraction of the size, our design makes space-hogging boilers and storage tanks totally obsolete.

Too smart to fail

What we make performs to nearly impossible standards. As robust as diesel engines, Intellihot systems are built for decades of like-new operation. Reliability is designed into every inch, from maintenance-free heat exchangers to systems that deliver industrial water capacities without risk of single-point failure. The best part? Built in redundancy and no master controller with our patented masterless cascading technology.

Change Made Effortless

Technology should adapt to people, not the other way around. Our systems are simple to install, use and maintain - for our customers and our customers' customers. Even as our innovations operate out of sight, every aspect is crafted to be enjoyable, intuitive and surprisingly smart.
