Subject: Compliance with Buy America Act Standards for Intellihot i250 Tankless Water Heater

We are pleased to announce that the Intellihot tankless water heater listed here fully complies with the Buy America Act standards. This certification ensures that our product meets the requirements set forth by the Act, which promotes the purchase of American-made goods for federally funded projects.

At Intellihot Inc., we are committed to producing high-quality products that not only meet industry standards but also adhere to regulations that support the growth of domestic manufacturing. Our compliance with the Buy America Act underscores our dedication to providing reliable and innovative solutions while contributing to the advancement of the American economy.

i250 is 55.14% USA Made

The Buy American Act (BAA), 42 U.S.C. §§ 8301-8305, as implemented by applicable provisions of the Federal Acquisition Regulation (FAR), generally requires that supplies acquired by federal agencies for use in the United States be "domestic end products." An end product qualifies as domestic if it is manufactured in the United States, and either: (1) more than 50% of the cost of all of its component parts are also manufactured in the United States, or (2) it is a commercially available off-the-shelf (COTS) item.

Sincerely,

Amy Turner
