# Floor Mount Metal Door Installation

## Steps to Remove Old Door

1

Unplug the display and cut the 4 zip ties that hold the display harness to the old door.

2

Remove the old hinge covers by pushing the bottom of the hinge cover away.

3

Using a 2.5 mm Allen wrench, remove the screws that hold the hinges to the frame.

4

Remove the old door seals.

# Floor Mount Metal Door Installation

## Steps to Install New Door

- 1** Inspect the metal door and the display received to ensure there is no shipping damage.

If the door or display is received with any sort of shipping damage, please reach out to Intellihot Technical Support

Intellihot Technical Support:  
Email: [Support@intellihot.com](mailto:Support@intellihot.com)  
Phone: 866-692-6791

- 3** While another person holds the metal door in place, install the hinges to the frame using a Phillips head screwdriver.

- 2** Peel off the covering on the new door seals and install them onto the frame.

- 4** Close the door and adjust the latches so that the metal door is completely sealed against the unit.

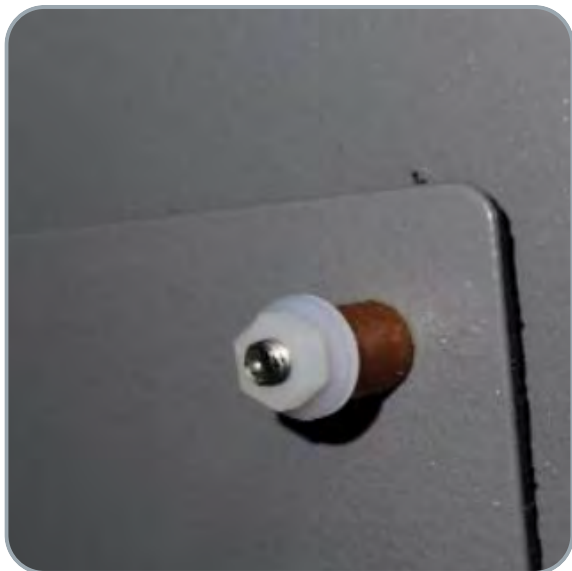

# Floor Mount Metal Door Installation

## Steps to Install New Door

5

Using a 5.5 mm socket and ratchet, remove the 4 plastic screws and washers from the display mounting screws.

6

Insert the display onto the 4 mounting bolts for the display, and tighten down the 4 nuts by hand.

Do not overtighten these nuts as it can interfere with the responsiveness of the display

7

Route the display harness on to the metal door as shown below.

8

install the mounting zip tie on to the harness. Leave it a little bit loose.

# Floor Mount Metal Door Installation

## Steps to Install New Door

9

Insert the zip tie on to the mounting hole as shown.

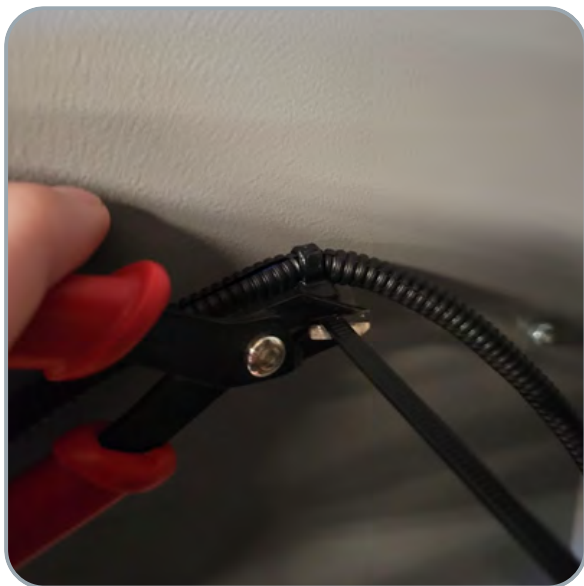

10

Connect the display harness to the display port. Adjust the harness so that it forms a smooth connection.

11

Tighten the zip tie and cut off the excess zip tie.

12

Turn ON the unit and perform touch operations on the display. **If the display is not responsive, loosen the plastic nuts.**
